THIS WEEK: **ORANGE**

LAST WEEK: **ORANGE**

This dashboard is intended to give our community a snapshot of data each week as it relates to COVID-19. It is important to note that most reported cases of COVID-19 in our school community are a result of household contact. Not all positive student or staff cases came into contact with our schools during the positive person's infectious period. We receive cases and quarantine information from the Vigo County Health Department on an ongoing basis, and this data changes on an hourly basis.
